Exercise

Overview

A broad range of electronic resources are used in the National Response Framework, and are available to local responders engaged in Incident Command activities.

In this exercise you will access some of these tools and discuss how each can assist you in functioning within the Incident Command System (ICS).

Objectives

1. Access tools available electronically.

2. Describe how the tool can be used to carry out the activities in a specific role in the ICS.

My ICS duties/role: ________________________________

Depending on the class size and your role, you may work in small groups, or individually. In small groups, you may select a note taker for the report back to the other participants.

Evaluation usefulness of an electronic resource for ICS activities
**Access**

Use a laptop, tablet or smartphone to access a tool that might be used in your role in the ICS.

Complete the following:

Website or application tool: ________________________________

This technology/tool would assist me in performing my duties by:

______________________________________________________________________
______________________________________________________________________
______________________________________________________________________
______________________________________________________________________
______________________________________________________________________
______________________________________________________________________

**Discuss**

Be ready to discuss with the other participants what you or your group learned.
