

8-Hour Modular Emergency Responder Refresher

Participant Guide

Acknowledgments

The Midwest Consortium developed this course for emergency responders under cooperative agreement number U45 ES 06184 from the National Institute of Environmental Health Sciences.

We encourage you to comment on these materials. Please give your suggestions to those teaching the program in which you are now enrolled or click on 'contact us' at <https://mwc.umn.edu>.

Warning

This material has been copyrighted by the Midwest Consortium for Hazardous Waste Worker Training. A recipient of the material, other than the Federal Government, may not reproduce it without permission of the copyright owner.

The material was prepared for use by experienced instructors in the training of persons who are or who anticipate responding to chemical emergencies. Authors of this material have prepared it for the training of this category of workers as of the date specified on the title page. Users are cautioned that the subject is constantly evolving. Therefore, the material may require additions, deletions, or modifications to incorporate the effects of that evolution occurring after the date of this material preparation.

Disclaimer

The Occupational Safety and Health Administration (OSHA) standard to help ensure health and safety during emergency response activities requires training for responders, depending upon the duties to be performed (See 29CFR1910.120(q)(6)). After initial training and employer certification, responders must annually receive sufficient refresher training to maintain competencies or demonstrate competencies. (See 29CFR1910.120(q)(8)). This program is designed to assist the employer in the annual documentation of competencies of first responders who have completed initial training at the operations-level or higher.

Additional training may be required to perform specialized tasks such as work in permit-required confined spaces or advanced control techniques
